## Beever and Struthers: Achieving Better with Digital Know-How

Hello,

Welcome to our **Digital Transformation Newswire**, your twice-yearly peek into how we're rethinking audit, embracing innovation, and making change feel a little less daunting.

We're now into our **second year of working with Alliance Manchester Business School and Aston University**, and we're excited to say: great things are happening. This collaboration continues to blend research, innovation and on-the-ground know-how – helping us, and our clients, navigate digital change with confidence and a bit of curiosity too.

Our **Digital Transformation team** has grown – not just in numbers, but in what we can offer. Whether it's making sense of data, smoothing out processes, or helping you get more from your systems, we're here to support you every step of the way.

One way we're doing that is through **interactive business information** – bringing scattered, hard-to-reach data together so it's useful, visual, and easy to act on. Using Power BI, we create dashboards and reports that connect to your accounting software, CRM, HR systems and more – turning raw numbers into real insight. So you can make better decisions, faster (without needing to wrangle 14 spreadsheets and a late-night coffee).

We're also helping clients get the most from **cloud accounting** – because, let's face it, it's where accounting is headed. Tools like Xero and QuickBooks let you access your finances anytime, from anywhere, and connect with hundreds of other apps to automate the boring bits and boost collaboration. Whether you're just getting started or already using cloud software and want to level up, we can help you:

- Choose the right system.
- Set it up properly.
- Train your team to get the most out of it.
- Review your setup and recommend improvements.
- Navigate the (sometimes overwhelming) app ecosystem – including helping other accountants do just that!

Still wondering what this looks like in practice? Take a look at a few of our recent **client case studies** below to see how we're helping real organisations unlock the power of digital.

**Tenet Consultants** is a fast-growing engineering and design consultancy based in Warrington, with a second office in Anglesey. As the business grew, their finance processes started to slow them down, so they turned to our Digital Transformation team for support.

[Find out more](#)

**QED Scientific** is a leading medical equipment supplier, serving healthcare facilities across the UK. Founded in 2005, QED Scientific is a real “family” business. The team is focused on working to meeting customers' needs.

[Find out more](#)[Find out more](#)

**Manchester South Central Foodbank** opened in April 2014 in response to the need for a foodbank that covered the Hulme, Moss Side, Whalley Range and Old Trafford areas. These are some of the most deprived areas in Greater Manchester, which is an area with a high level of poverty.

**Clitheroe Auction Mart**, in the North West of England, offers a service to the farming community since 1897. They hold weekly/fortnightly sales of Primestock, Store Sheep and Store Cattle, along with an extensive sales programme of Breeding Sheep in the Autumn.

If any of these stories strike a chord or if you're simply curious whether there's a better, easier or more digital way of doing things - **get in touch**. We'd love to chat and help you explore what's possible.

## pro-manchester: Trailblazing Tech Confernece 2025

We're proud to sponsor **pro-manchester's Tech Trailblazing Conference** – a brilliant showcase of innovation right here in the North. Once again, we are happy to promote that our **Tech Lead John Toon**, will be joining one of the expert panels, sharing insights on how digital transformation is reshaping the way organisations think and work.

At Beever and Struthers, we believe tech should be practical, people-focused, and make life easier – and that's exactly what we're there to talk about. You can book your place and join the conversation **here**. We'd love to see you there!
